

Build Better Programs in Minutes

Plug-and-play programming system designed to help coaches build efficient, adaptive, and athlete-centered workouts with clarity and purpose

Created by Garrett Phelps, founder of Strength Through Systems

This template is for new or experienced strength coaches who want to stop guessing and start programming with purpose. It's designed for coaches who value system clarity and prefer using movement patterns and adaptations—not random lifts—to guide progress.

This template gives you a structured, plug-and-play system to build weekly strength training sessions that align with your programming goals. Instead of randomly selecting exercises, this tool helps you:

- Categorize movement by joint position (narrow, long, wide stance)
- Match exercises to the right adaptation (Output, Hybrid, Durability, Power)
- Maintain balanced stress across movement patterns and ranges
- Track what adaptations you're programming and what you're missing

Instructions

Step 1: Start with an empty Weekly Programming Sheet. (next page)

Step 2: With every exercise you place into the program, check off the box that corresponds to the adaptation within that specific movement pattern.

Step 3: Once finished with your week's program, audit your checklist list see if there are any gaping holes within your program. If so, look back at your program and see places where you could add the missing adaptation.

Step 4: Repeat, do this week over week, phase over phase, to allow you to see what you are programming your athletes and where your program may be lacking.

A=Adaption

[illegible]

Adaptation Glossary

Output (O): to create as much force as possible

Hybrid (H): to produce force over a long period of time

Durability (D): to maintain a specific position for a long time

Express (E): to assess the skill of movement

Power (P): to produce force quickly.

Adaptation Check List

Movement	Output	Hybrid	Durability	Express	Power
Hip Flexion/Extension					
Hip Abduction/Adduction					
Hip IR/ER					
Spine Rotation					
Spine Anti Rotation					
Spine Lateral Flexion					
Spine Anti Lateral Flexion					
Spine Flexion/Extension					
Spine Anti Flexion					
Shoulder Flexion					
Shoulder Extension					
Shoulder Hori Add/Abd					
Vertical Jump					
Horizontal Jump					
Lateral Jump					

Lower Body Training

Narrow Stance

Back Squat
Front Squat
Zeacher Squat
BB RDL
Trap Bar Deadlift
BB Deadlift
Good Mornings
Clean
Snatch
Volume
Sets: 2-6
reps: 2-6
Tempo: Fast

Long Stance

Stationary Lunge
Front Foot Elevated Split Squat
Rear Foot Elevated Split Squat
Reverse Lunge
Walking Lunge
Volume
Sets: 4-6
reps: 8-12
Tempo: Moderate

Wide Stance

Lateral Lunge
Volume
Sets: 2-3
Reps: 8-12
Tempo: Slow

Upper Body Training

Mid Range

Floor Press
Bench Press
DB Row
Cable Row
Bicep Curls
Tricep Extensions

Volume
Sets: 4-6
reps: 6-10
Tempo: Fast

High Range

Shoulder Press
Cable Pull Down
High Cable Bicep Curl
Pull Up
Landmine Press
Overhead Tricep Extensions

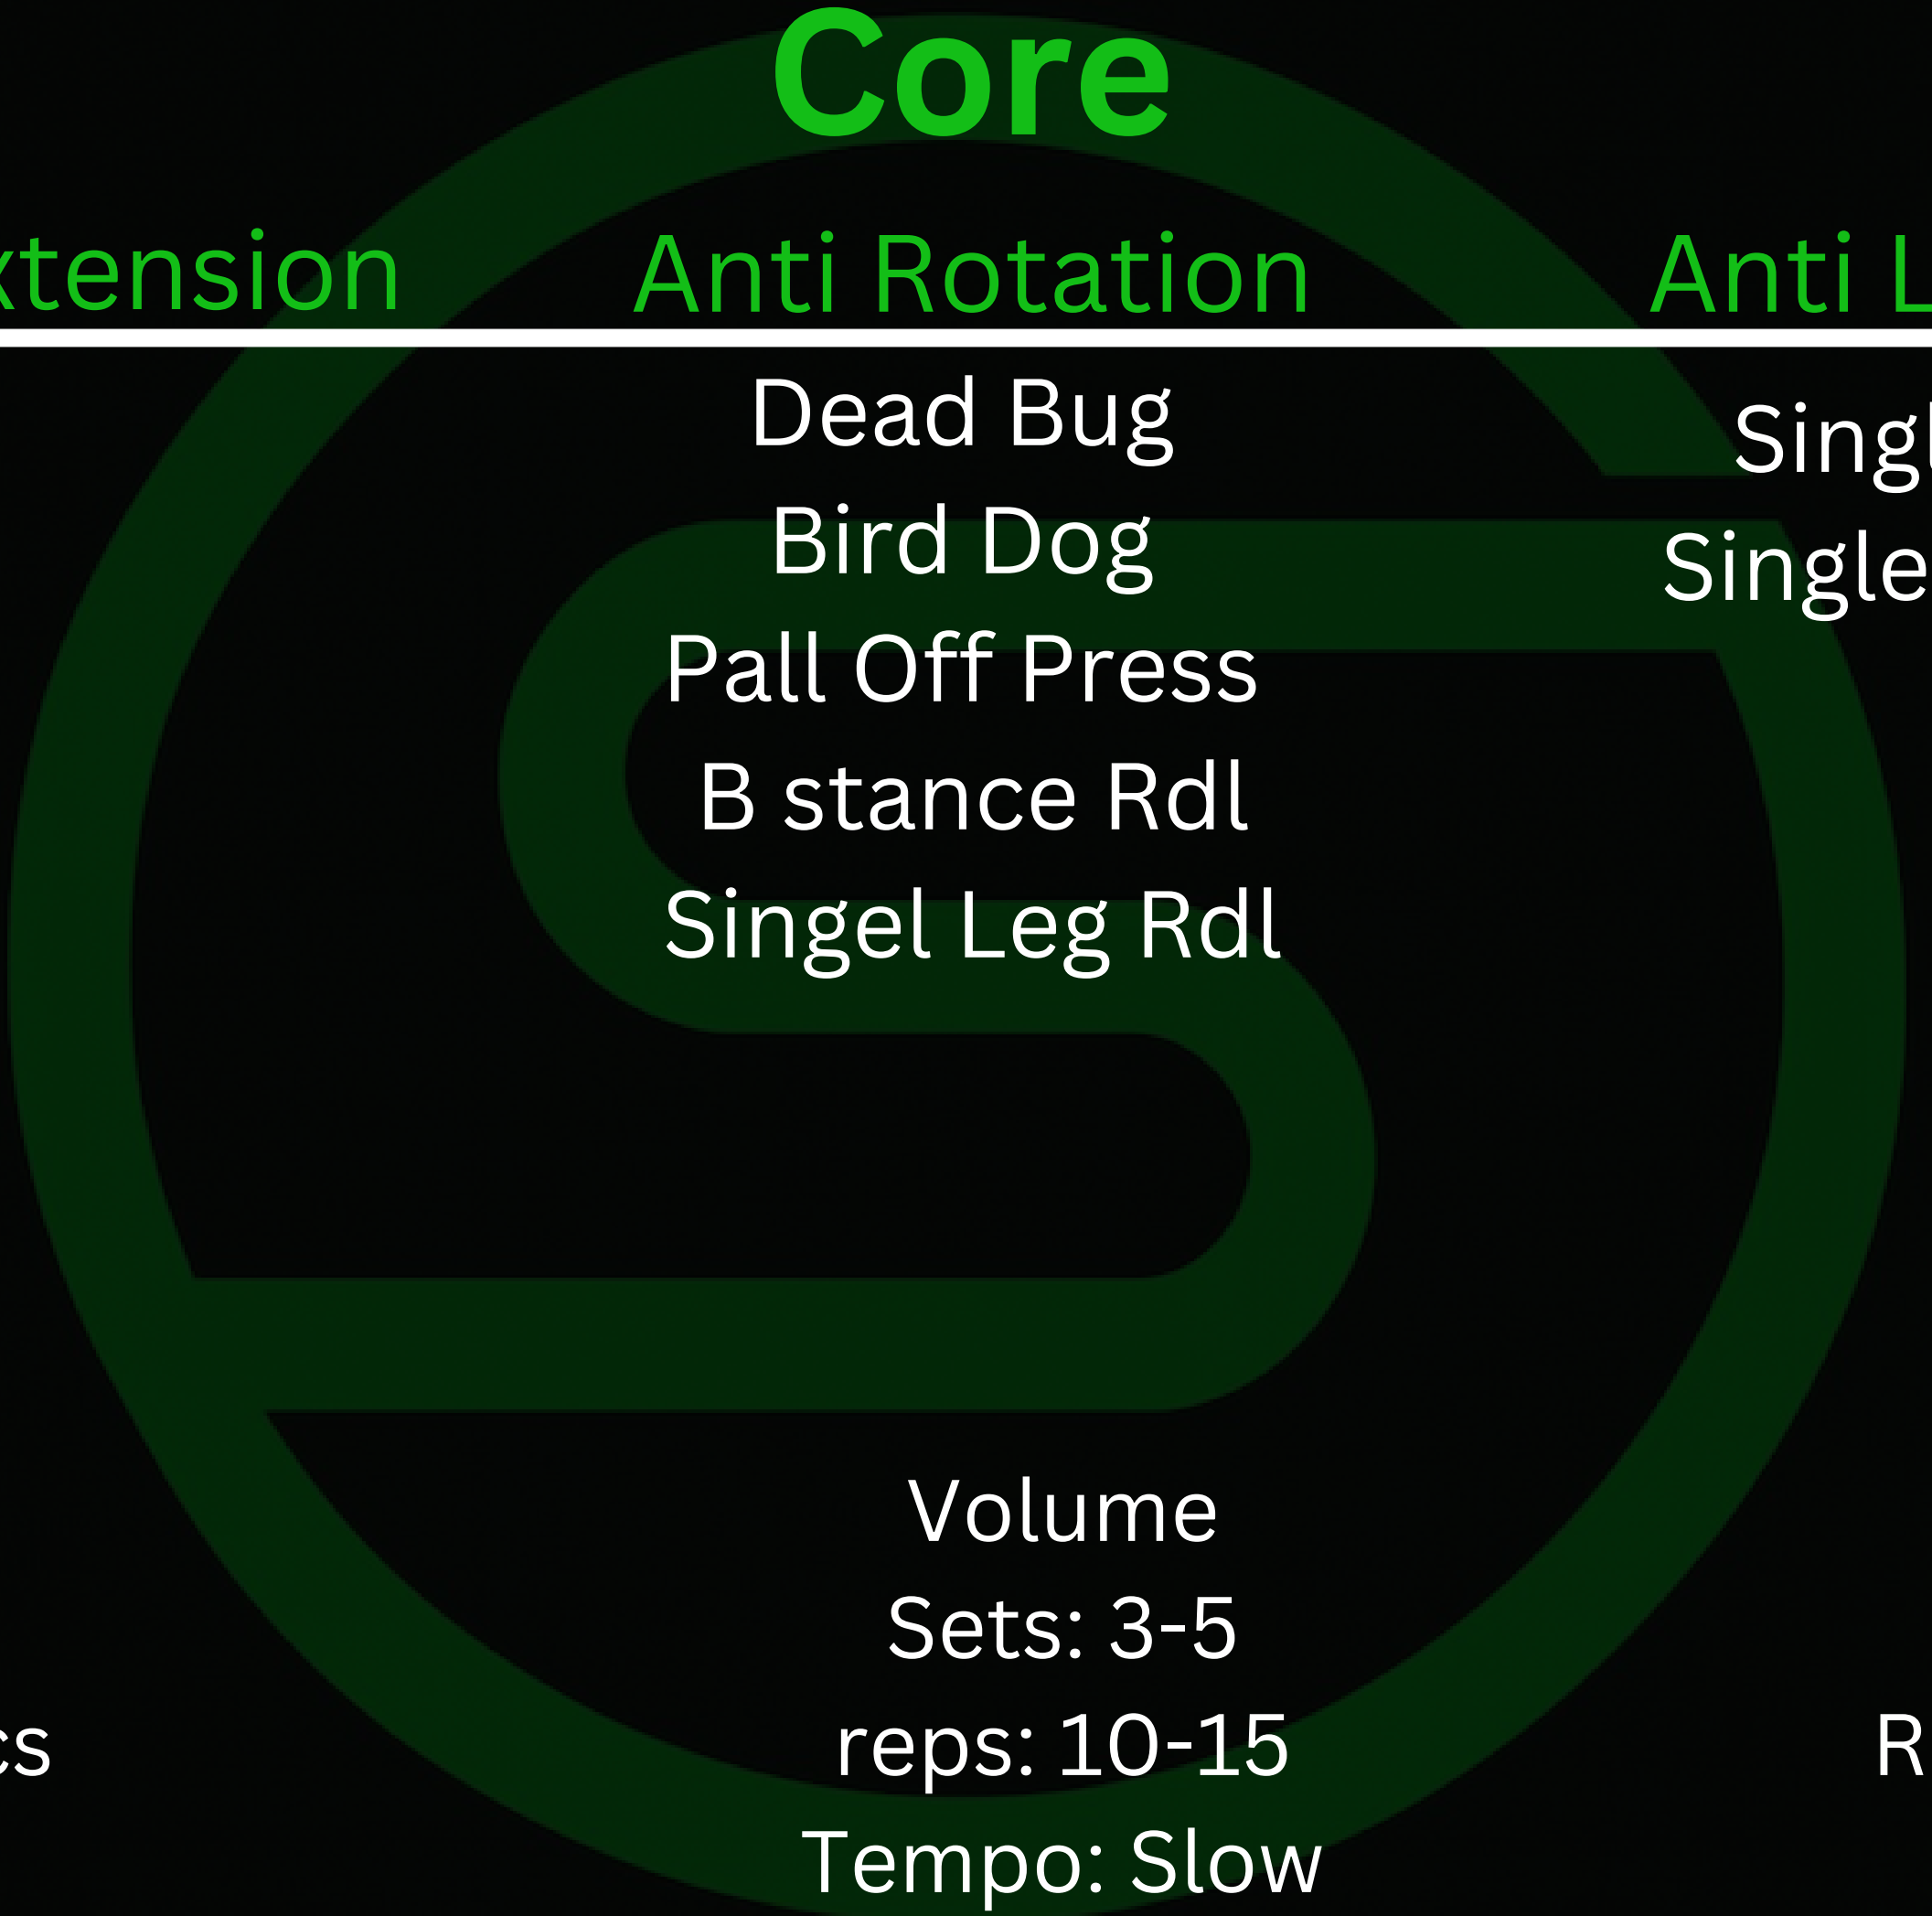

Volume
Sets: 2-3
reps: 10-15
Tempo: Slow

Low Range

Hip Bridge Press
Narrow Bench Press
Dips
Low Cable Row
Incline Bicep Curls

Volume
Sets: 2-3
reps: 8-12
Tempo: Moderate

Core

Anti Flexion/Extension

Planks
Hollow Holds
Bear Crawls

Volume
Sets: 2-4
Reps: 20-60 secs
Tempo: Iso

Anti Rotation

Dead Bug
Bird Dog
Pall Off Press
B stance Rdl
Singel Leg Rdl

Volume
Sets: 3-5
reps: 10-15
Tempo: Slow

Anti Lateral Flexion

Single Arm Carries
Single Arm OH Carries

Volume
Sets: 2-3
Reps: 20-60 secs
Tempo: Iso

Plyometrics

Vertical

Horizontal

Lateral

Assisted Pogos

Vertical Jumps

Depth Drop to Vertical

Broad Jumps

Bounds

Single Leg Bounds

Skips

Lateral Jumps

Depth Drop to Lateral

Volume

Sets: 3-6

reps: 2-3

Tempo: Fast

Throws

Type: Toss, Shot Put, Over Head

Facing

Bilateral
B Stance
Single Leg
Half Kneeling

Side

Bilateral
B Stance
Single leg
Half Kneeling

Momentum

Shuffle
Step Back
Step Through
Figure 8

Volume
Sets: 2-4
reps: 2-3

Tempo: Fast
